Are you looking to hunt during the rut or off rut. If you would like to hunt during the rut which is considered a trophy hunt you can usually expect a three to ten year wait to draw depending on the species. If you are looking to hunt off the rut you can usually expect to get drawn every year to two years. Arizona is a draw state so there are no guarantees of drawing a tag with the time frames represented, and all species vary odds greatly especially big horn sheep and buffalo.
